Year 01 Semester 02

Online Recipe Management System

Introduction

As group MLB_03.01_09, we are assigned to develop an online recipe management system. We are determined make this project an efficient and user-friendly as much as possible. Our system provides a web based platform which the users can easily access both their favorite food & beverage recipes that goes along with their personal preferences.

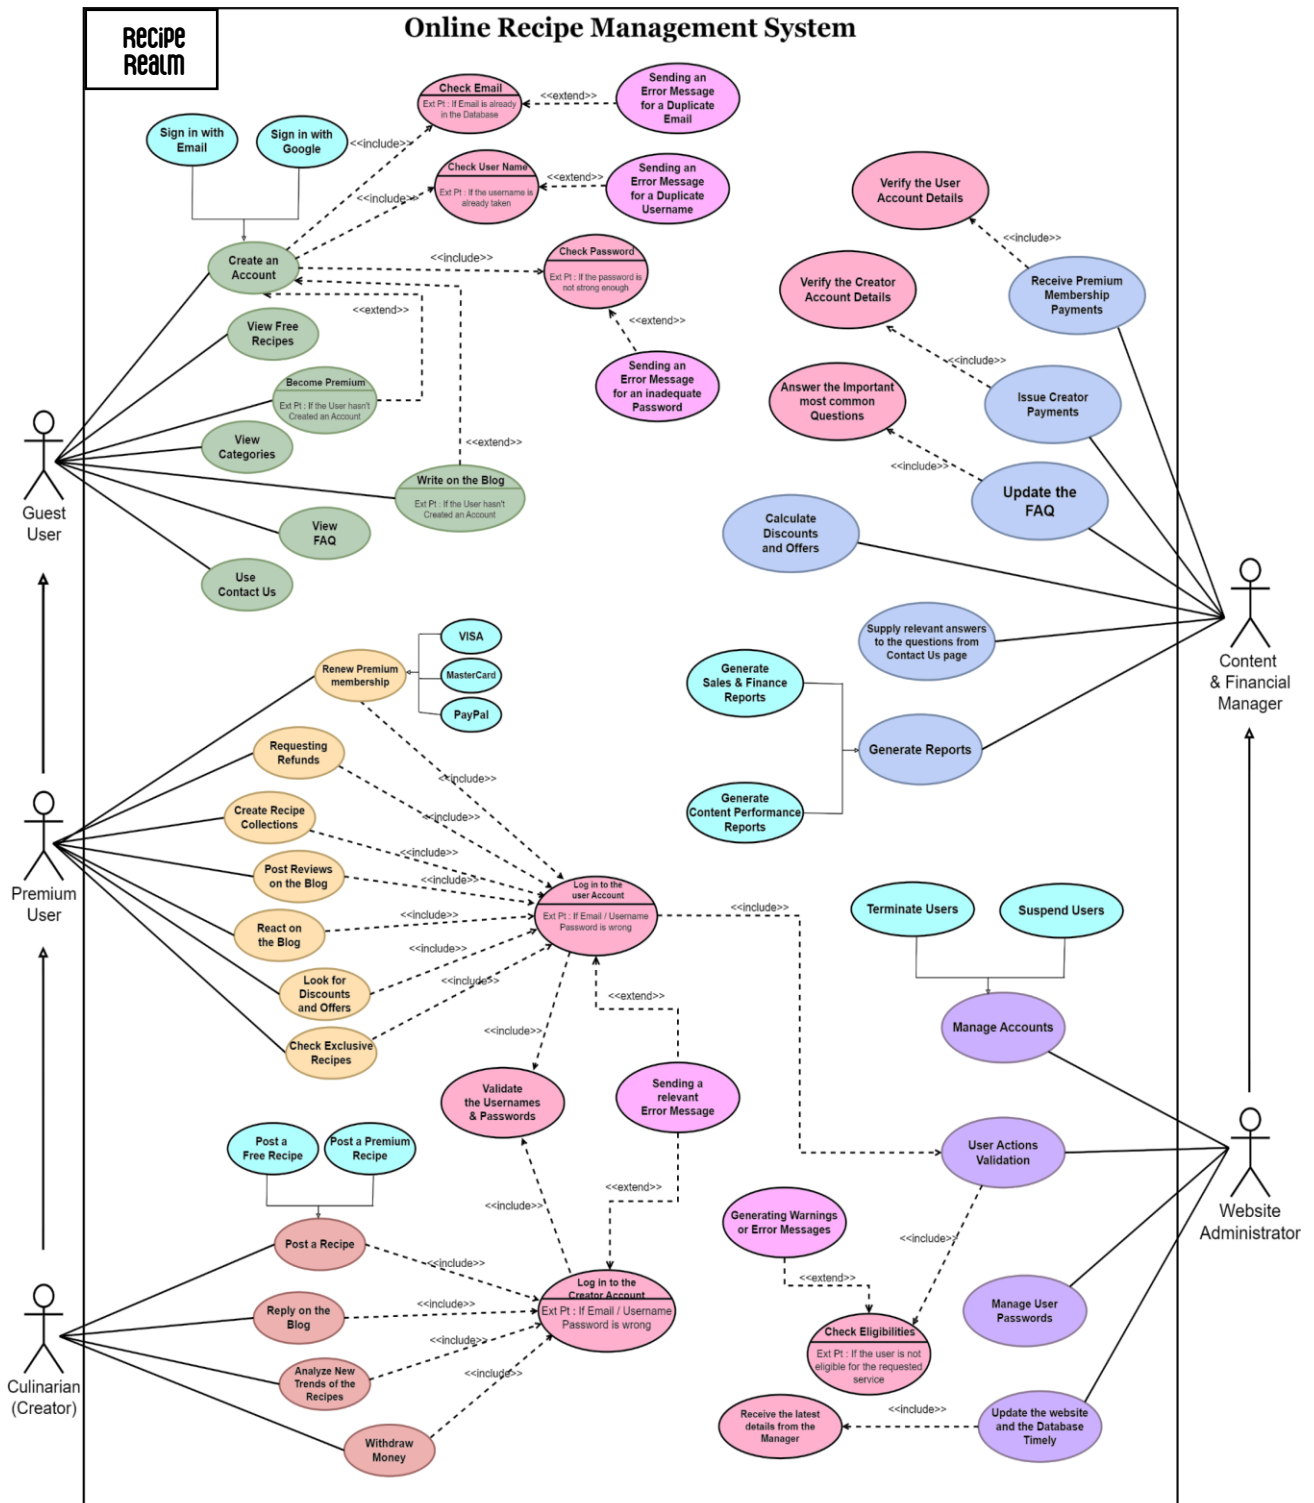

This system welcomes all the users with a basic free plan and also offers a premium subscription which will unlock the most latest and trending recipes scattered across the world in one place and much more exclusive contents. This platforms functionalities encompass recipe storage, categorization, easy retrieval, personalized collections and a blog which the users can post their culinary creations and share them among others.

Our objective here is make busy people's life more easier and approach their plates with convenience and quality products that are entwined with us. In order to do that, we try our best to make this platform a social element which foster the vibrant communities of food enthusiasts.

Assignment 01

IT1060 - Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

IT23183018 – HIRUSHA D.G.A.D.

a) . Individual Contribution

- ❖ Designed and drew the actor, **The Culinarian (The Content Creator)** in the Use Case Diagram.
- ❖ Designed and made **two** Use Case Scenarios for **The Culinarian (The Content Creator)**.

b) . Special Contribution

- ❖ Drew the entire Use Case Diagram using draw.io workspace after putting everything together along with help of other group members.
- ❖ Encouraged the other group members to finish the project as **The Group Leader**.
- ❖ Finalized the Report, after managing and putting together other group members ideas.

c) . Encountered Challenges

- ❖ Had to face the tight schedule of submitting both IWT, SPM & ISDM Assignment 01s in the same time period .
- ❖ Had to generate the output of the use case diagram multiple times due to uncompleted issues before finalizing it.
- ❖ It was difficult to grasp a clear idea about how to draw the diagram at first but with the support of every group member, I was able to overcome that problem successfully.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Number	01	
Use Case ID	IT23183018	
Use Case Name	Post a Recipe	
Summary	The creator logs in to his account and then post a new recipe.	
Priority	05	
Pre-Condition	The creator should login to his creator account initially.	
Post-Condition	The creator successfully post the recipe after customizations.	
Primary Actor(s)	The Culinarian (The Content Creator)	
Trigger	The creator wants to publish a new recipe as for his content.	
Main Scenario	Step	Action
	01	The creator enters his account credentials correctly and logs in.
	02	Visits the Creator's Profile.
	03	Navigates to the Create Section.
	04	Types the recipe title, then adds the ingredients and the method accordingly.
	05	Checks the relevant search tags regarding the recipe.
	06	Uploads Image(s) of the final outcome of the recipe.
	07	Clicks on the post button to publish the Recipe.
Extensions	Step	Branching Action
	01.a	The system notifies that the username is invalid.
	01.b	The system notifies that the password is not correct.
	07.a	The system asks whether to publish the recipe for all users.
	07.b	The system asks whether to publish the recipe only for the premium users.
Open Issues	#	
	01	The creators are not allowed to upload a video tutorial of making the dish due to technological limitations.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Number	02	
Use Case ID	IT23183018	
Use Case Name	Withdraw Money	
Summary	The creator logs in to his account and withdraw some money.	
Priority	04	
Pre-Condition	The Creator should login to his creator account initially.	
Post-Condition	The Creator receives the confirmation email that says the withdrawal is successful.	
Primary Actor(s)	The Culinarian (The Content Creator)	
Trigger	The Creator wants to withdraw some money from his earnings.	
Main Scenario	Step	Action
	01	The creator enters the account credentials correctly and logs in.
	02	Visits the Creator's Profile.
	03	Navigates to the Payments Section.
	04	Selects the payment method of his / her choice.
	05	Enters the relevant details regarding the payment.
	06	Verifies the that payment is received successfully.
Extensions	Step	Branching Action
	01.a	The system notifies that the username is invalid.
	01.b	The system notifies that the password is not correct.
	04.a	Selects the relevant bank account.
	04.b	Selects the relevant e-wallet address.
Open Issues	#	
	01	Some creators are failed connect their bank accounts because some banks don't have necessary international support.
	02	Most people were pushed to create new e-wallets which are unfamiliar due to various issues when dealing with bank accounts.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

IT23189294 – GUNATHILAKA H.D.I.

a) . Individual Contribution

- ❖ Designed the actor, **The Guest (Free Plan) User** in the Use Case Diagram.
- ❖ Designed and made **two** Use Case Scenarios for **The Guest (Free Plan) User**.

b) . Special Contribution

- ❖ Shared the thoughts and ideas regarding other members Use Case which was benefitting.
- ❖ Helped to develop the Use Case Diagram by introducing some new use cases.

c) . Encountered Challenges

- ❖ Had some difficulties when meeting the group members to work together in person because of the busy schedule.
- ❖ Had to manage the time smartly since the mid – term examination was right up - close.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Number	03	
Use Case ID	IT23189294	
Use Case Name	Upgrade the account to Premium	
Summary	The guest creates an account & tries to become premium.	
Priority	03	
Pre-Condition	The guest must create a free account initially.	
Post-Condition	The user makes the premium membership payment.	
Primary Actor(s)	The Guest (The free plan user)	
Trigger	The user wants to access the exclusive contents of the website.	
Main Scenario	Step	Action
	01	The guest successfully creates an account.
	02	Visits the user profile or recipe gallery.
	03	Clicks on the Go Premium Button.
	04	Selects the payment method of his/her choice.
	05	Enters the relevant details regarding the payment.
	06	Validates the payment by an One Time Password.
	07	Verifies the that payment is sent successfully.
Extensions	Step	Branching Action
	01.a	The system notifies that the email is invalid.
	01.b	The system notifies that the username is already taken.
	01.c	The system notifies that the password is not strong enough.
	04.a	Select the relevant bank account / card method.
	04.b	Select the relevant e-wallet address.
Open Issues	#	
	01	The website offers no free trial to experience the benefits of being premium.
	02	Ensure that the website provides a considerable money back guarantee.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Number	04	
Use Case ID	IT23189294	
Use Case Name	Use Contact Us page.	
Summary	A guest visits the website and requests some additional information through the contact us page.	
Priority	04	
Pre-Condition	The guest visits website.	
Post-Condition	The guest sends the message successfully through contact us.	
Primary Actor(s)	The Guest (The free plan user)	
Trigger	The guest wants to know more details which is not published.	
Main Scenario	Step	Action
	01	The guest visits the website.
	02	Checks out the Free Recipes to begin with.
	03	Gets the information while browsing through the website.
	04	Navigates to the contact us page in search of additional information.
	05	Fills out the required fields and type the information that he/she seeks.
	06	Clicks on Send Message to get the relevant information.
Extensions	Step	Branching Action
	03.a	Visits the Blog and read the reviews.
	03.b	Goes to the About Us page of the website.
	03.c	Navigates to FAQ section.
	05.a	The system generates an error message if the given email is invalid.
Open Issues	#	
	01	The guest must create an account in the website in order to write on the Blog.
	02	The guest must create an account in the website in order to give feedbacks.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

IT23190566 – GANEGODA R.B.

a) . Individual Contribution

- ❖ Designed the actor, **The Website Administrator** in the Use Case Diagram.
- ❖ Designed and created **two** Use Case Scenarios for **The Website Administrator**.

b) . Special Contribution

- ❖ Helped to finalized the Use Case Diagram.
- ❖ Shared the latest ideas regrading The Website Administrator's use cases.

c) . Encountered Challenges

- ❖ Faced some difficulties when summarizing the whole content for The Use Case Scenarios.
- ❖ Troubled when choosing the ideal Use Case Scenarios in order include in the finalized report.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Number	05	
Use Case ID	IT23190566	
Use Case Name	Manage User Passwords	
Summary	The admin changes the password of an user account.	
Priority	05	
Pre-Condition	A user sends a request to change the password of his/her account.	
Post-Condition	The admin sends a confirmation email notifying that the password has been changed accordingly.	
Primary Actor(s)	The Website Administrator	
Trigger	The admin is asked to change the password of an user account.	
Main Scenario	Step	Action
	01	The admin accesses admin dashboard.
	02	Navigates to user management section.
	03	Receives the request to change the account password.
	04	Verifies that if the request is sent by the rightful user.
	05	Initiates the password changing process.
	06	After user confirms the new password, updates the user account and the database.
	07	Sends a confirmation email notifying that password has been changed successfully.
Extensions	Step	Branching Action
	04.a	If the verification is failed, the change password process will be terminated.
	05.a	The system notifies that the new password is not strong enough.
	05.b	The system notifies that the data entered in new password and confirm password fields are not the same.
Open Issues	#	
	01	Not having integrated a Multi-Factor Authentication makes the user passwords are unsafe.
	02	Ensuring the system informs the user that the new password complies with privacy policies such as minimum length, use of special characters etc.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Number	06	
Use Case ID	IT23190566	
Use Case Name	Manage User Accounts (Terminate user accounts)	
Summary	The admin removes an user account which caused a violation.	
Priority	05	
Pre-Condition	The admin receives report messages regarding digital violation.	
Post-Condition	The admin terminates the user account regarding the violation.	
Primary Actor(s)	The Website Administrator	
Trigger	The admin is asked to take action on digital violation.	
Main Scenario	Step	Action
	01	The admin accesses admin dashboard.
	02	Navigates to user management section.
	03	Receives the report messages about a community violation or terms & conditions violation.
	04	Verifies that if this user has truly acted upon any digital violation.
	05	Notify the user with warning messages to remove the content which has caused the digital violation.
	06	If the user continues on doing the same, terminate the user account.
	07	Sends an email notifying that the user is banned from the platform due to violating community guidelines or terms & conditions.
Extensions	Step	Branching Action
	04.a	If the verification shows the user has not committed any violation, ignore the report messages.
	05.a	Suspend the user temporary with a given period of time if the user refused to remove the ill - content.
	06.a	Monitors the behavior within the platform of this particular user after the suspension period.
Open Issues	#	
	01	Ensuring the users to follow community guidelines and other policies to manage reputation and user experience of the platform.

Assignment 01

**IT1060 – Software Process Modeling
Semester II - 2024**

Year 01 Semester 02

IT23195202 – HARSHANA L.L.E.

a) . Individual Contribution

- ❖ Designed the actor, **The Premium User** in the Use Case Diagram.
- ❖ Designed and made **two** Use Case Scenarios for **The Premium User**.

b) . Special Contribution

- ❖ Shared the ideas about implementing Premium & Exclusive features in the platform.
- ❖ Helped to develop the Use Case Diagram by introducing some new use cases.

c) . Encountered Challenges

- ❖ Had less time to finish relatively.
- ❖ Had a deal with a heavy workload due to the mid exams and other modules assignments' work.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Number	07	
Use Case ID	IT23195202	
Use Case Name	Post reviews on the Blog	
Summary	The user is going to post review on selected recipe(s).	
Priority	02	
Pre-Condition	The user needs to log in to the platform using the credentials	
Post-Condition	The user reads blog posts and add his/her thoughts as reviews.	
Primary Actor(s)	The Premium User	
Trigger	The user is determined to review the recipes published by the content creators.	
Main Scenario	Step	Action
	01	Logs in to the platform using his/her user credentials.
	02	Navigates to the Blog.
	03	Click on add to create a new post.
	04	Add a the Title of the post.
	05	Start writing the review on the body section.
	06	Tag the relevant recipe which the review speaks about.
	07	Click on post to publish the review in the blog.
Extensions	Step	Branching Action
	01.a	The system generates an error message if the username is wrong.
	01.b	The system generates an error message if the password is wrong.
	05.a	The system informs the user to save the review as a draft if the user has to suddenly leaves the website.
	07.a	The user can edit the review after publish it on the blog.
	07.a	The user delete the review after publish it on the blog.
Open Issues	#	
	01	The content manager should always monitor the blog to prevent addressing or spreading false information by reviewing recipes without any fact-checking process.
	02	The system should protect the users' privacy when posting reviews to avoid any personal conflicts.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Number	08	
Use Case ID	IT23195202	
Use Case Name	Renew Premium Membership	
Summary	The user is making the payment to renew the premium membership.	
Priority	04	
Pre-Condition	The user needs to log in to the platform using the credentials.	
Post-Condition	The user successfully renew his membership.	
Primary Actor(s)	The Premium User	
Trigger	The user is informed that his premium membership is going to be expired on due time.	
Main Scenario	Step	Action
	01	Logs in to the platform using his/her user credentials.
	02	Navigates to the user account.
	03	Clicks on the Go Premium button.
	04	Choose the preferable payment method from givens.
	05	Visits the payment portal and enters the required card details or e-wallet details.
	06	Confirms that the payment is rightfully authorized.
	07	Receives the confirmation email that says the user has been upgraded to premium membership.
Extensions	Step	Branching Action
	01.a	The system generates an error message if the username is wrong.
	01.b	The system generates an error message if the password is wrong.
	02.a	Navigates to the item gallery other than visiting user account.
Open Issues	#	
	01	Long term premium users expect more discounts and offers due to their loyalty towards the platform.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

IT23191006 – COORAY Y.H.

a) . Individual Contribution

- ❖ Designed the actor, **The Content and Finance Manager** in the Use Case Diagram.
- ❖ Designed and made **two** Use Case Scenarios for **The Content and Finance Manager**.

b) . Special Contribution

- ❖ Collected most of the information and resources by browsing through the internet to get a clear idea about an online recipe selling platform.
- ❖ Shared some useful ideas within the group and continuously supported the team to develop the project.

c) . Encountered Challenges

- ❖ Faced some challenges when writing the proper main scenario steps of the given particular use case scenarios.
- ❖ Had some difficulties when dividing the appropriate tasks as use cases for The Content and Finance Manager.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Number	09	
Use Case ID	IT23191006	
Use Case Name	Update the Frequently Asked Questions	
Summary	The content manager updates the FAQ section of the website.	
Priority	04	
Pre-Condition	The content manager accesses the FAQ section.	
Post-Condition	The FAQ section successfully updated with managers modifications.	
Primary Actor(s)	The Content Manager	
Trigger	The content manager identifies newly arisen a set of common questions and decides to update the FAQ section using them.	
Main Scenario	Step	Action
	01	Logs in to the platform using his/her credentials.
	02	Navigates to the admin panel.
	03	Visits Contents Section.
	04	Click on the Update button in the FAQ section.
	05	Type new questions and their relevant answers accordingly.
	06	After customizations, click on Finish to publish the updated FAQ page.
Extensions	Step	Branching Action
	01.a	The system generates an error message if the username is wrong.
	01.b	The system generates an error message if the password is wrong.
	05.a	If the answer to a particular question is subjective, inform the users at the end of the answer; to use the contact us page for a much more precise answer.
	05.a	If the answer to a particular question is subjective, inform the users at the end of the answer; to use the contact us page for a much more precise answer.
Open Issues	#	
	01	Need to establish a schedule for regular updates and maintenance for the FAQ section.
	02	Need to implement version control mechanisms to track the changes, maintain the history over time.

Assignment 01

IT1060 – Software Process Modeling
Semester II - 2024

Year 01 Semester 02

Number	10	
Use Case ID	IT23191006	
Use Case Name	Generate Reports	
Summary	The content manager updates the FAQ section of the website.	
Priority	05	
Pre-Condition	The manager accesses the Reports section.	
Post-Condition	The manager observes the platform's analytics and makes reports.	
Primary Actor(s)	The Content Manager	
Trigger	The manager decides to generate reports to make the future arrangements of the website.	
Main Scenario	Step	Action
	01	Logs in to the platform using his/her credentials.
	02	Navigates to the admin panel.
	03	Visits Reports Section.
	04	Choose the desired report type.
	05	Set parameters to filter-out the relevant data in need.
	06	Initiate the report generation process.
	07	Click on Print to get a hardcopy of the generated report.
Extensions	Step	Branching Action
	01.a	The system generates an error message if the username is wrong.
	01.b	The system generates an error message if the password is wrong.
	04.a	Whether to generated report regarding sale & finance.
	04.b	Whether to generated report regarding user activity & recipe performance.
	05.a	Filter the data weekly - based.
	05.b	Filter the data monthly - based.
	05.c	Filter the data annual - based.
Open Issues	#	
	01	Ensuring the accuracy and readability of the data.
	02	Ensuring all the relevant data is included before the report is generated.
